

Ready 4 Learning Interface

Helping you to be organized & efficient

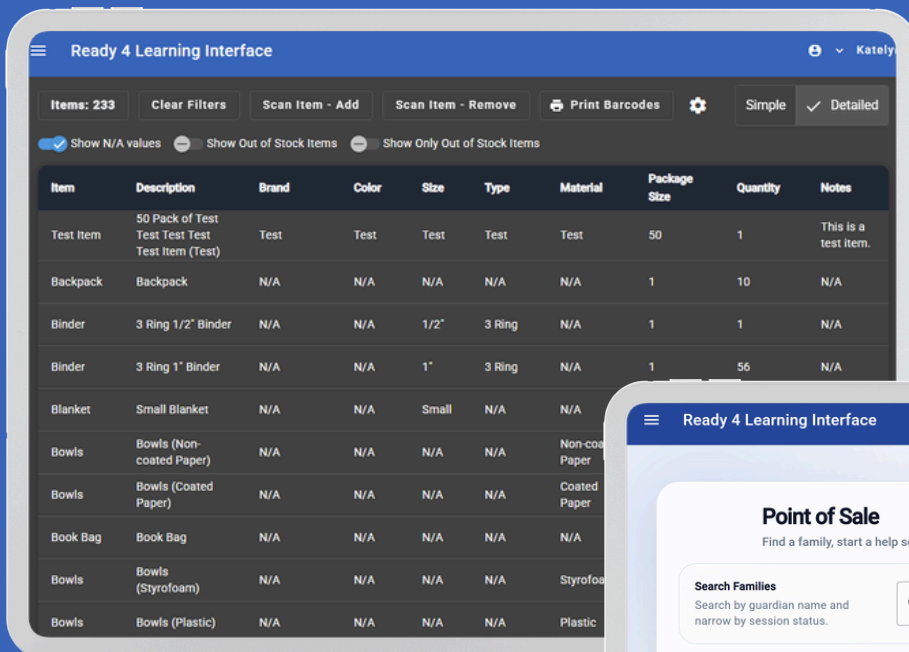

Ready 4 Learning Interface is a web application designed to improve the ease of management and quality of life for staff, volunteers, and families participating in a school supply drive.

The login system grants role-based access control, allowing families to manage their own information through a family portal while giving staff full control over user permissions, roles, and data management.

The Families page gives staff a quick overview of student and family counts by grade and school, with full management of individual family records and filtering by name or registration type.

The inventory management system enables full item tracking and editing with barcode scanning support, automatic stock reporting with PDF/XLSX export, and flexible filtering and display options.
